

European Innovation Partnership Active and Healthy Ageing

Andalusia: a 3-star Reference Site

Ana M. Carriazo, MD PhD Regional Ministry of Health of Andalusia 10.02.2016

- Becoming involved in the first call
- Initial process
- Description of Good Practices
- Reasons to participate
- Benefits and challenges
- Recommendations

Invitation for expression of intent to be a candidate Reference Site

"Reference Sites":

- regions, cities or integrated hospitals/care organisations
- established in a geographical location in Europe
- provide a comprehensive innovation based approach to active and healthy ageing
- provide concrete example of existing and successful integrated solutions, based on evidence of their impact in practice
- expected to contribute significantly to building the synergies between the different Partnership Actions
- Interested parties can submit their Expressions of intent via an online tool
- **→ Deadline: 31 May 2012**
- ➤ All submitted Expressions of Intent to be a candidate Reference Site will be made **publicly available**

Conditions for a candidate Reference Site

Candidate Reference Sites need to:

- ➤ Be national/regional/local authorities or public/private care institutions (e.g. integrated hospitals/care organisations) in Europe
- ➤ Build a coalition of partners involving relevant actors (e.g. professionals, patients, carers and families, industry and service providers, public authorities etc.)
- ➤ Be willing to implement a **substantial** part of the actions of the SIP in an integrated way → Specific Actions spanning **across the 3 pillars**
- ➤ Be ready to demonstrate coverage of a significant proportion of the target population (at least 10%), by the services of the Specific Actions
- > Present a list of results/outcomes to be delivered in the 2013-2015 timeframe
- ➤ Be ready to exchange good practice, share information and make publicly available data on outcomes/impact
- > Be ready to cooperate with other relevant initiatives across Europe
- ➤ Be ready to perform an assessment, and be assessed by peers, on the outcomes and impacts according to a commonly agreed methodology
- Assessment of Candidate Reference Sites foreseen for mid-2013

Andalusia:

- -Decision to participate: merging of Ministries of Health and of Social Welfare
- -Being aware of the lack of direct funding
- -Political decision
- -Initial submission for becoming a candidate for RS

Andalusia

Main features

- **8,492,635** inhabitants
- >22 **M** tourists
- Political Autonomy since 1981
- Full responsibility at regional level on Public Health and Healthcare services since 1984
- Regulatory framework for Social services

Public Healthcare System

1500 Primary care centres 47 Hospitals (93% h beds) 100,000 healthcare workers

3800 Pharmacies (private) PHC is the gatekeeper

European Innovation Partnership on Active and Healthy Ageing Reference Sites

Excellent Innovation for ageing A European Guide

Examples of impact: Increase of usage and user satisfaction of AeHS:

The Regional Ministry of Health and Social Welfare is in charge of health and social welfare policies and

leads the Andalusian Public Healthcare Service (APHS)

and the Andalusian Social Services Agency

The Andalusian e-Health Strategy (AeHS) enhances the quality of life of citizens and the coordination of health and social carers through electronic integration of health information. It is available to all 8.5 million inhabitants and all pharmacies and public healthcare professionals participate. Some of the innovative services provided to the population include: the information on each patient, electronic prescription,

Site; Regional Ministry of Health and Social Welfare of Andalusia

- 139 million e-prescriptions in 2012;
- 100% coverage of mobile intensive care units for
 - 7,532 queries to access the EHealth Record in 2012; training in mobile health applications;
 - 12,470 subscriptions to SMS alerts;
- over 4000 downloads of the health apps in over 30 countries.

The economic impact of the AeHS:

(elimination of printing costs) and € 3.2 (data ePrescription: saving of € 3,1 million management);

electronic health record unifying the health

telemedicine services and mobile health applications.

- average stay of 7,5 days in 2008 to 7,16 in 2012) decrease of consultations in family medicine decrease of hospital admissions (from an
 - (-16,11% from 2007 to 2012).

Several Andalusian and Andalusia-based companies

participated in EU-funded projects like Commwealth

Palante and Independent.

45AA services have a wide outreach:

- about 1 million elderly are Junta-card holders; 50,000 participants in the University
 - 138.891 patients used Physiotherapy and Programme for Elderly;
- 3.699 patients used Mobile Units; rehabilitation services

rity and training and comprises initiatives such as

The Andalusian Strategy on Active Ageing (ASAA) applies to all 1.280.000 65+ citizens. It integrates policies around the pillars health, participation, secuprogrammes to promote physical activity, the Andalusis Junta 63 card (for discounts and benefits in transport, cultural, sport, and leisure activities), the University Programme for the Eiderly; and an elderly annual

 Health check-up for people over 53 reached 63% of the target.

ASAA results in terms of economic investment and return:

Junta card has brought savings of £200 million;

 B29 companies have registered and 2.672 jobs are estimated to have been created in the C1 million investment in supporting care material for people with special needs;

entrepreneurship programme SENIOR.

MANUAL DE SHIDNINEUR COMMENSOR DE SANCTARA DE COMPANION DE CAMACIONA D

2^a Conference of Partners of the EIP on AHA Brussels, 25 nov 2013

Participation of the Regional Minister of Equality, Health and Social Policies:

Pannel "Social and Economic Grow and Jobs"

BROAD DISSEMINATION OF THE REGIONAL STRATEGIES
PRESENTED AS GGPP

Reasons to participate:

- -Political dimension
- -Opportunities for exchange of good practices
- -Share the experiences
- -Synergies with Action Groups
- -Active participation leads to active engagement in projects and initiatives (funding opportunities)
- -Collaboration with wide range of stakeholders

Integrating health and social care

- Cita Previa
- Salud "24 horas"
- Libre elección hospital
- Segunda opinión médica
- Servicio SMS
- Seguimiento de pacientes
- Enfermera gestora de casos
- Voluntad vital anticipada
- Servicio teletraducción

DCCU

Assessment

centre

Challenges and recommendations:

- -Different languages and health and social care models and systems
- -Important to participate actively, but there are limitations to do so.
- -Engage people regionally to contribute to the broader discusions
- -Innovation
