

Dear all,

I am writing from Comicon - a Bulgarian R&D SME which is active in the field of industrial automation - development, supply and implementation of equipment for control and monitoring of systems and processes.

Our customers are companies from the energetic, chemical industry, mining and metallurgy, telecommunication, building, machine building, light industry, etc.

Our main activities are:

- development and production of telemetric and specialized controllers, ZigBee devices, radio modems 2.4 GHz, solar controllers, programmable logic controllers (PLC) and distributed inputs/ outputs (I/O) and other devices for industrial automation;
- R&D of hardware, firmware and software according to client specification;
- energy management systems,
- telemetric systems for wireless control and monitoring of remote installations,
- complete engineering of automated systems.

If you are looking for a partner for your joint R&D Project within Eurostars programme with similar to our qualification we would be glad to work with you.

For further information please, don't hesitate to contact us.

With best regards,

Zhivka Koleva,

Marketing manager
