

C2-SENSE

Interoperability Profiles for Command/Control Systems and Sensor Systems in Emergency Management

FP7 – Grant Agreement nr. 607729

Refiz Duro

AIT Austrian Institute of Technology GmbH

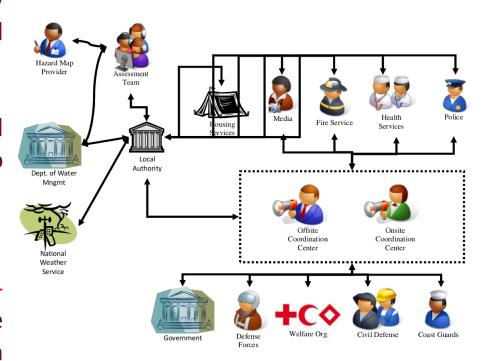

The Challenge

Effective management of emergencies depends on timely information availability, reliability and integrity.

Different Command and Control Systems and Sensor Systems have to cooperate – interoperability.

However, unless standards and welldefined specifications are used, the interoperability of these systems can be very complex.

C2-SENSE (Main) Objectives

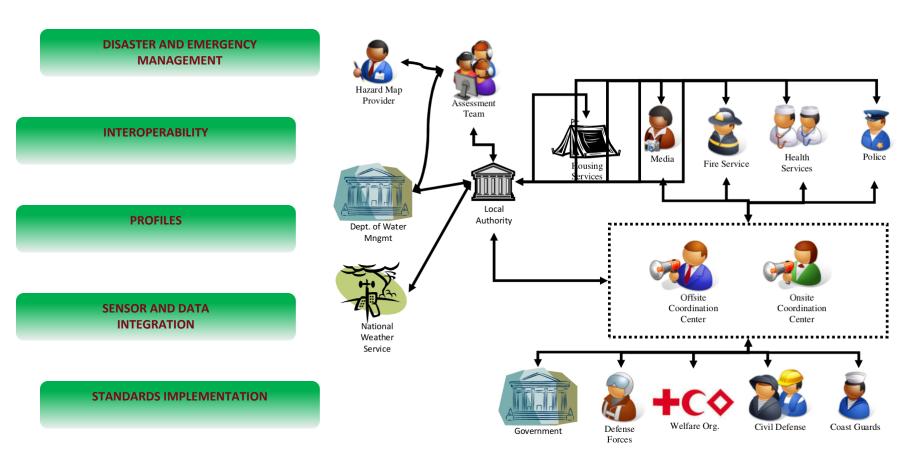

Develop a profile based Emergency Interoperability Framework

- Identify, define and test the *profiles* in the emergency management domain
- Further Develop Interoperability Stack
- Development of Emergency Domain Ontology
- Implement the framework in a pilot in an area often hit by floods (Italy)

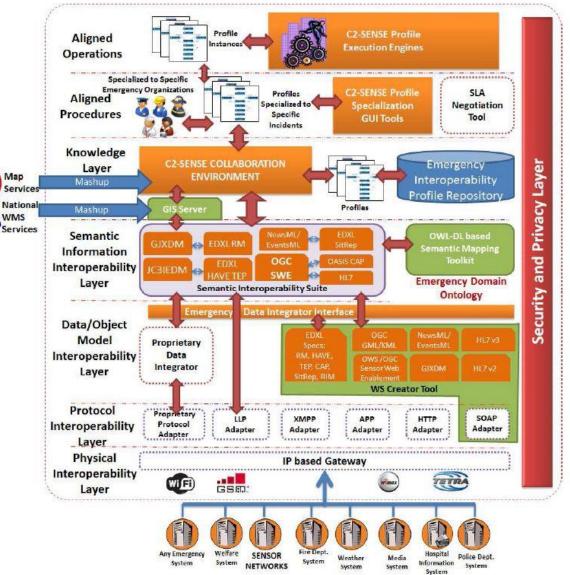

"Interoperability Profiles for Command/Control Systems and Sensor Systems in Emergency Management"

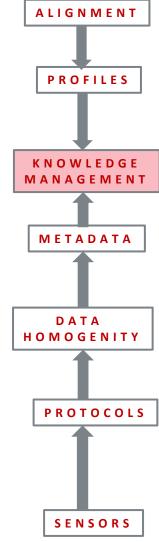

C2-SENSE Framework

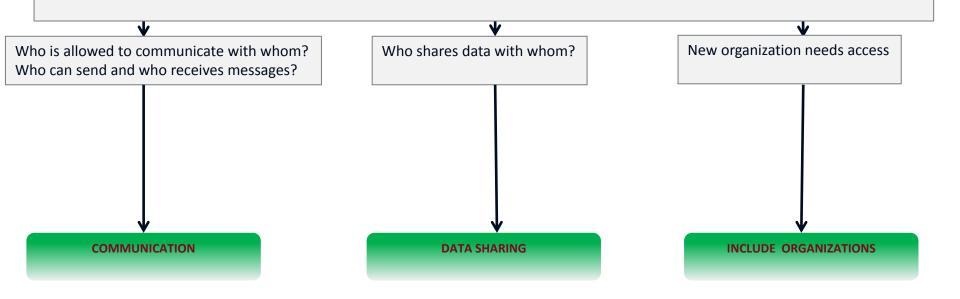

Profiles

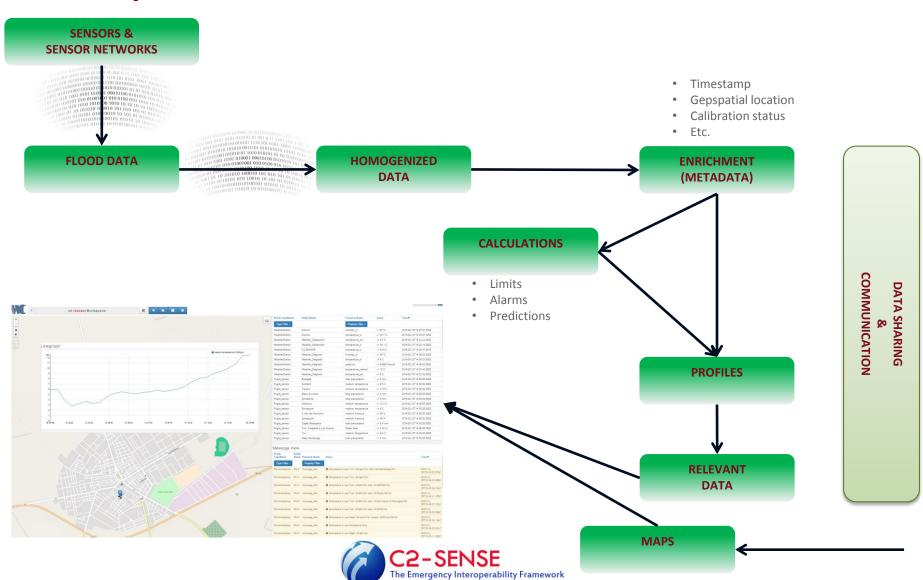

- Solve variations in responsibilities that are present among organizations and authorities
 - Remove cultural and linguistic variations
 - Provide access to relevant (sensor) data
 - Identify relevant management actions
 - Allow for communication among appropriate partners
 - Service Level Agreements

Consortium

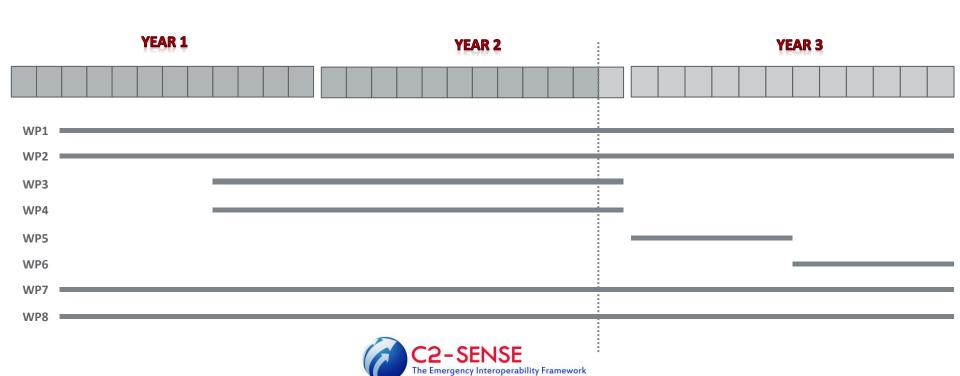

SAGEM DEFENSE SECURITE	France	Project Coordinator Data / Object model interoperability.
LUTECH	Italy	Protocol interoperability . Software integration.
Austrian Institute of Technology	Austria	Knowledge interoperability . Specifications. Standardization activities.
SRDC	Turkey	Information interoperability . Profiles integration. Certification and testing mechanisms.
Servizio Protezione Civile Regione Puglia	Italy	Pilot application – requirements and validation.
InnovaPuglia	Italy	Pilot application – design and deployment.
Industrial Research Institute for Automation and Measurements	Poland	Organizational and physical interoperability.
REGOLA	Italy	Harmonized doctrines. Validation.

General Steps in C2-SENSE

WP1 WP3 WP4 WP5 WP6 WP7 WP2 WP8 Technical & Organizational Dissemination, Administration Integration of Interoperability Pilot State of the art Semantic Interoperability Research **Testing Mechanism** Application Exploitation, & Management Technologies & Interoperability Deployment Standardization Requirements Results and and Innovation Implemented related Activities Systems
