

**Smart Anything Everywhere**

**ICT Innovation for  
Manufacturing SMEs**

**Funding**

**Networking**

20 September 2018

Wien, Austria

**SMART AND DIGITAL  
FUTURE Vienna - Brno -  
Bratislava**

**Digital technologies transform high-tech *and* low tech business sectors and have a major impact on the labour market and the society.**

**“How to foster the whole digital potential” – information and networking event for the manufacturing industry!**

The European initiatives *Smart Anything Everywhere* (SAE) and *ICT Innovation for Manufacturing* (I4MS) provide funding for small-scale projects to support digital innovations based on specific needs of SMEs. Projects need to involve the collaboration of SMEs with public research centres. The focus is mainly on industrial companies (in the sectors of manufacturing, automotive, aerospace, safety-critical applications), including also traditional low-tech industries like agriculture or construction.

### **Topics covered**

- Cyber-Physical Systems
- Internet of Things
- Smart Systems Integration
- Electronic Components and Systems
- Advanced Computing
- Organic and Large Area Electronics
- Modelling and Data-Analytics
- Robotics
