

The 7th China Jiangsu Conference for
International Technology Transfer and Commercialization (CITTC)

November 11-13, 2020 Nanjing, China

Invitation

Dear Sir/Madam,

Located in the Yangtze River Delta on China's eastern coastal area, Jiangsu is one of the regions in China with the most rapid economic growth and the greatest openness and vitality. Its economy has been at the forefront in China with high-quality development. In 2019, the GDP of Jiangsu reached RMB 9,960 billion (about USD 1,400 billion) and the total volume of import and export surpassed RMB 4,300 billion (about USD 600 billion), both among the national top.

Jiangsu is strong in science and technology with abundant education and research resources, rich talent pool, well-developed S&T facilities and intellectual property rights protection system. Its regional innovation capacity has been taking the national lead. With a strong industry foundation and enormous market potential, the province has become an important manufacturing hub in China. Jiangsu companies, active in innovation and international exchanges, have large demands for cutting-edge technologies and strong capability of technology absorption and commercialization. The province provides a solid foundation and desirable environment for the application and promotion of global technologies. In addition, Jiangsu, with a growing number of advanced and applicable technologies, is now looking for overseas partners.

Since 2008, Ministry of Science and Technology of the People's Republic of China (MOST) and Jiangsu Provincial People's Government have successfully held six sessions of the China Jiangsu Conference for International Technology Transfer and Commercialization (CITTC), which has become one of the largest and most influential events of international innovation cooperation and exchange in China. To further promote Jiangsu's openness in innovation, the 7th CITTC will be held with the theme "Networking Online, Partnership for Innovation", in Nanjing from November 11 to November 13, 2020. Echoing the global efforts in COVID-19 control, most of the activities under CITTC will take place online, including online technology roadshows, virtual B2B meetings, webinar and symposium on innovation cooperation.

We sincerely invite you to attend the conference and look forward to our win-win cooperation.
