- **Experience:** *Serious and organized crime - corruption*
- **Contact:**
  - *António Fonseca*
  - *Criminal Analyst , UIIC-SCIC-BA*
  - *antonio.fonseca@pj.pt*
  - *+351 211967130*

## *TOPIC*

[SU-FCT02-2019](#)

Open sub-topic  
Any project helping to fight crime and terrorism

- *Need to process huge quantities of textual data (emails, bank statements, computer forensics, ...)*
- *Need to collect information about remote companies*
- *Need to clearly visualize patterns and relations in data*

- *Web search engine for remote companies (small companies globally – Africa, Asia, South America, offshore companies, ...)*
- *Legacy adapter of the previous with local database*
- *Visualization engine for complex entity-relation data*

- *Could start by a small subset of African countries, then expanded*
- *Community project - partnership with other LEAs*
- *Many visualization tools already available, some of them mature (i2 Analyst Notebook) but difficult to interface*
- *No need for "fancy" algorithms*
- *No need for big infrastructure*
