

AAL CALL 2018

Smart Solutions for Ageing well

Dr. Gerda Geyer

Key Differing Features

- AAL Call 2018 is open to collaborative projects developing ICT-based solutions targeting any application area(s) within the AAL domain, with a focus on specified markets.
- AAL Call 2018 allows for more flexibility regarding the scope, size and duration of the proposed projects (including small collaborative projects).

Collaborative Projects

- “Collaborative projects” (carried out by consortia composed by at least 3 organisations from 3 different countries including an end user organisation and a business partner) will still be funded through this call.
- The big news of the Call 2018 is the inauguration of a new and agiler approach to innovation: the Small Collaborative project.

Small collaborative projects

- duration of 6 months
- maximum co-funding budget of €300.000
- leaner application and reporting procedures

Not all national agencies will fund small collaborative projects.

Main Objectives

- Exploration of new ideas, concepts and approaches for ICT-based solutions for older adults
- Reach out to new stakeholders for inclusion in (future) development of AAL solutions
- Build strong collaborations with end-user organisations
- Support community building with new customers and create shared agendas

Infodays

**31 January 2018, Brussels
national launch event, planned for
February 2018**
