NHM Vienna is pleased about the visit of Federal Minister Martin Polaschek

On September 1, 2022, Federal Minister Ao. Univ.-Prof. Dr. Martin Polaschek visited the Natural History Museum Vienna and got to know the museum’s citizen science initiatives. In 2024, the NHM Vienna and the University of Natural Resources and Life Sciences (BOKU) will jointly hold the annual Austrian and the special international Citizen Science Conference funded by the Federal Ministry of Education, Science and Research (BMBWF).

As one of the largest non-university research institutions in Austria, the Natural History Museum makes significant contributions, especially to collection-based research. It is not only modern laboratory equipment and new methods of population genomics that make the museum a high-performance research institution, but also the proactive opening of the collections as a research infrastructure is an essential.

I’ve been involved in social innovation since the beginning of my professional life. I believe that courage and open-mindedness are essential for any kind of progress, and COST provides the perfect platform for such people. I am happy to be part of four different COST Actions and to meet socially and environmentally conscious researchers from Europe. Over the last three years I have gained a lot of knowledge, published with my colleagues, and made new contacts.

Bahanur Nasya, Chairwoman, Wonderland - Platform for European Architecture
