## Crossing Borders

### Giving SSH a voice in Europe and beyond

NET4SOCIETY is the international network of National Contact Points (NCPs) for Socio-economic Sciences and Humanities (SSH) in the EU's 7th Framework Programme (FP7). National Contact Points advise you on all aspects of FP7 funding opportunities and help you cross borders with your research ideas.

NET4SOCIETY has established itself as a strong, efficient and evolving network connecting all SSH NCPs, the EU Commission, researchers and other relevant stakeholders. NET4SOCIETY gives SSH a voice in Europe.

The network facilitates knowledge exchange between SSH NCPs with the aim of improving the support offered to researchers. By organising trainings and providing a platform for information distribution, each SSH NCP gains full and easy access to the tools of the trade.

NET4SOCIETY is a growing network, offering its services across Europe and beyond.

## Supporting SSH researchers

Socio-economic Sciences and Humanities (SSH) research plays a decisive role in tackling the challenges that Europe faces.

With the aim of promoting European excellence, NET4SOCIETY supports SSH researchers with:

- **Events** for information exchange, research discussion and matchmaking to find relevant research partners
- **SSH newsletter** with key information
- **Research Directory**, the international SSH database of actively involved researchers and key players in SSH is designed to facilitate cooperation within FP7
- **Partner Search Support**, to find partners for specific calls
- **SSH Opportunities**, a compilation of SSH relevant research topics in all areas of FP7 as well as in Joint Technology Initiatives, Joint Programming Initiatives and ERA-NET calls.

## Increasing SSH visibility

NET4SOCIETY increases the visibility of SSH in Europe through the organisation of high-profile events that address major developments in the FP7 SSH programme. These events are targeted at policy makers, researchers, civil society organisations and other key players.

The network maintains an ongoing dialogue with the European Commission and other relevant stakeholders to discuss how research results in Socio-economic Sciences and Humanities can be harnessed to address Europe's major societal challenges. NET4SOCIETY actively contributes to the discussion of the future of SSH in European research funding beyond FP7.

NET4SOCIETY informs the SSH research community about major events and useful documents aimed at strengthening the position of the SSH programme. These are available at the network's website:
