

ENR DESIGN (2011) - Final Conference in Vienna

Rapid and Durable Maintenance Methods and Techniques

Overall aim of the joint research programme "Design - Rapid and durable Maintenance" is to improve road conditions for the short- and long-term. The solutions have to be feasible, valid and cost-effective.

Datum	23.01.2014 12:00 - 24.01.2014 13:00
Ort	Tech Gate Vienna Wissenschafts- und Technologiepark, Wien
Anmeldung	12.07.2013 bis 20.01.2014
Themenbereich	Mobilität
Maximale Teilnehmerzahl	80
Zielgruppe	Gebietskörperschaften
Veranstaltungstyp	Konferenz
FFG Bereich	Thematische Programme

The programme is based on three objectives which are described below together with an expected output. The objectives were developed with the concepts of: A) Safely Optimising Road Network Availability during Maintenance B) Durable Construction and Maintenance Methods C) Strategies for Reducing Maintenance Costs At the Final Conference the results of the 6 projects are presented and discussed by experts. The conference is free of charge and will be held in English.

Target group is experts from the road directorates, members of CEDR Task Groups and the research community.

Please register [HERE](#) (max. 80 participants)
